

DRAINAGE DISTRICT

MISSION

The primary mission of the Fort Bend County Drainage District is to maintain the drainage channels, where the District has easements, in their existing flow conditions. This is accomplished through appropriate structural repairs and vegetation control. Secondly, the District provides a review of plats and drainage plans of new development to be approved by Commissioners Court to assure the elimination of an adverse drainage impact on current and future residents.

GOALS

GOAL 1

Maintain Existing Level of Service

The current level of services evolved to the present level based on taxpayer and landowner demands and received funding approval of the Drainage District Board (Commissioners Court).

- Objective 1** Maintain the existing network of 1,100 miles of drainage ditches.
- Objective 2** Provide the application of herbicides once or twice annually and mowing, all but the largest channels twice a year.
- Objective 3** Continue structural repairs and periodic channel rehabilitation.
- Objective 4** Assist landowners in the design of watergates, bridges and erosion control devices.
- Objective 5** Review all drainage plans of new development that is platted. Assure that developers mitigate whatever increase in flooding the new development may produce.

GOAL 2

Increase Level of Service with No Increase in Staff

Even though the existing level of service is higher than is needed for drainage purposes, some larger channels may receive only one mowing per year.

- Objective 1** Research and implement new methods and new types of equipment that are faster and more economical.
- Objective 2** Apply herbicides and mow all channels two or more times per year.

GOAL 3

Provide access to property records at the Drainage District facilities.

- Objective 1** Utilize computer equipment and staff to handle access to property records.
- Objective 2** Develop a GIS (Geographical Information Systems) base map and create overlays with databases containing the drainage systems input.

DRAINAGE DISTRICT

PERFORMANCE MEASURES	2009 ACTUAL	2010 ACTUAL	2011 PROJECTED
Total number of miles of channel maintained	1,988	2000	2,000
Total number of treeless miles of channel	602.6	602.6	602.6
Total miles of channel repaired	0	0	0
