Honorable KP George and Fort Bend County Commissioners Court
Honorable Mark Henry and Galveston County Commissioners Court
Honorable L.M. Sebesta, Jr. and Brazoria County Commissioners Court

RE: PROPOSED CDBG-MIT JOINT APPLICATION & PROJECT FOR CONSIDERATION BETWEEN FORT BEND COUNTY, GALVESTON COUNTY, AND BRAZORIA COUNTY

Dear Judge George, Judge Henry, and Judge Sebesta:

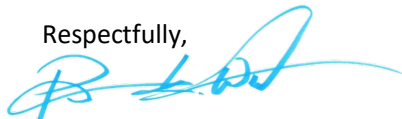

Please allow this letter, and the detail contained within, to serve as the basis for discussion of a proposed project between Fort Bend County, Galveston County, and Brazoria County for consideration in the upcoming Community Development Block Grant – Mitigation (CDBG-MIT) competition. The project consists of erosion repair of the Brazos River to protect the evacuation route of US 99 and US 59/I-69 bridges. The enclosed documents detail the project area, project scope, proposed budget, project beneficiaries, project schedule, and preliminary application score. Current estimated project costs are defined below:

Activity	Total
Construction	\$80,482,742.00
Engineering	\$12,072,411.30
Administration	\$5,321,921.00
Total	\$97,877,074.30

This project is being proposed as a multijurisdictional application between Fort Bend County, Galveston County, and Brazoria County due to the regional impact and location of project beneficiaries. The Application will be led by Fort Bend County with the support of Galveston County and Brazoria County. Fort Bend County will assume sole responsibility of the 1% match/local leverage for the proposed project, therefore Galveston County nor Brazoria County will be obligated to any financial commitment.

This material is to guide discussion about this proposed project and not intended to serve as the final authorization of the project. This information will serve as a substantially complete application and will be posted for a minimum 14-day public comment period prior to the official authorization and submission of an application.

Respectfully,

Patrick K. Wiltshire
President and CEO

Memorandum

DATE: October 1, 2020

TO: Mark Vogler
General Manager/Chief Engineer
Fort Bend County Drainage District

FROM: Joseph T. Myers, P.E., CFM

SUBJECT: Erosion Repair of the Brazos River
Protection of the US 99 and US 59/I-69 Bridges
Fort Bend County Application for CDBG-MIT Funding

Joseph T. Myers

Huitt-Zollars Inc.
Firm Registration No. F-761

Project Site & Description: Evacuation Route Protection

Due to the accelerated bank erosion on the Brazos River following significant flooding in 2015, 2016 and Hurricane Harvey in 2017, the Fort Bend County Drainage District conducted geomorphologic studies of the meander migration and bank erosion at thirty (30) selected locations along the eighty nine (89) miles of the Brazos River in Fort Bend County, Texas. These selected locations focused on government infrastructure to include roads, levees, bridges, buildings and parklands along the river. The results of these studies are most disturbing. In less than 30 years, continuing erosion of the riverbank may cause loss of human life while threatening residences, roads, levees and Hurricane Evacuation Routes on Farm to Market Roads, State Highways and Interstate bridges.

Project Brazos, a multi-jurisdictional effort to address riverbank erosion, has identified bank erosion at thirteen (13) of the most critical sites along the Brazos River in Fort Bend County. However the most critical component of the project is the protection of the SH 99 and US 59/I-69 corridors. The erosion at these two locations is threatening the bridges over the Brazos River and the safe evacuation of hundreds of thousands of residents from Galveston and Brazoria Counties during times of high winds and storm surge from hurricanes and tropical storms. The Project is a regional approach with broad support from local, state and federal stakeholders to include TxDOT, the Brazos River Authority and the USACE - Galveston District and its Engineer Research and Development Center (ERDC) in Vicksburg, Mississippi. Currently, fourteen (14) Resolutions and a Letter of Support have been received supporting Project Brazos. Over the past four years, Fort Bend County Drainage District and the City of Sugar Land have invested time and money into understanding the problem and in developing feasible solutions to address it. Project Brazos employs an environmentally friendly repair using a longitudinal stone dike along the toe of the bank with stone tiebacks constructed at around 200 feet on center to protect the upstream and downstream portions of the repair from being flanked by the erosion. This repair method was coordinated with USACE ERDC's River and Estuarine Engineering Branch. In addition, this repair method promotes revegetation and habitat development and is in accordance with USACE's "Engineering With Nature Initiative".

These projects will provide significant benefits to the safe evacuation of residents of Galveston and Brazoria Counties during hurricane and tropical storm evacuations.

Beneficiary:

The beneficiaries of this project will be the hundreds of thousands of residents in Galveston and Brazoria Counties that depend on open and safe evacuation routes prior to land fall of hurricanes and tropical storms that frequent the upper Texas Gulf Coast. Based on the available census data, 271,450 residents of both Galveston and Brazoria Counties, of which 51.17% are considered Low-to-Moderate Income (LMI) persons, will benefit from the project (see attached LMISD data).

The northern boundary of the benefit area is demarked by the northern most evacuation zone associated to hurricanes and tropical storms as determined by the Houston-Galveston Area Council of Governments (HGAC) in conjunction with the Texas Department of Public Safety (DPS). These zones are determined by zip code and can be referenced by the attached HGAC Hurricane Evacuation Zip Zones map. The evacuation zip zones stop at the Fort Bend County line; thus, the primary beneficiaries are the residents to the south of this area to include Brazoria and Galveston Counties.

The eastern boundary is demarked by the drive time proximity of residents to SH 6 route out of the City of Galveston and within both Galveston and Brazoria Counties. This is one of three (3) routes available to the residents of Galveston and the only one that does not go through a heavily populated region such as the City of Houston. It is believed that most residents will take the SH 6 route (see drive-time analysis exhibit for Highway 6) during periods of mandatory evacuation. SH 6 goes directly through the Cities of Hitchcock, Santa Fe, Alvin, Manvel, the southern portion of Pearland, and other smaller cities along the way. Additionally, communities located east of SH 6, including the City of La Marque, southeastern portion of Friendswood are expected to take the SH 6 evacuation route. Based on the drive time analysis we believe all of these locations would prefer to avoid the traffic they will certainly encounter along the major evacuation route of I-45 through the City of Houston. The SH 6 route proceeds northwest to the City of Sugar Land and the intersection of US 59. From there the route goes south to SH 99 and ultimately north on SH 99 to I-10 and points west away from the harmful impacts of the oncoming hurricane or rainfall of a tropical storm.

The western boundary is demarked by the Brazos River which meanders south splitting two other major thoroughfares - Highway 36 and SH 288. It is believed that the river will act as a physical deterrent of traffic evacuation traffic during a major disaster event. This claim can be supported due to the recent disasters which have seen both hurricane landfall and tropical storm rainfall impacts (Hurricane Harvey, 2017). Communities along this western most boundary, including portions of Freeport, the Cities of Lake Jackson, Angleton, and other smaller communities, will most likely travel SH 288 northwest to the confluence of SH 6 where they will continue north east along this route eventually traveling along the US 59/I-69 route and ultimately to SH 99.

Mitigation:

Along this evacuation route are the bridges of SH 99 and US 59/I-69 over the Brazos River. These bridges have already suffered some level of erosion damage from the Brazos River from past storms and natural disasters. The US 59/I-69 turnaround at the Brazos River was closed after the flood disasters of 2016 and Hurricane Harvey due to a portion of the turnaround being washed away. The Texas Department of Transportation (TxDOT) had attempted to shore up the area with a structural solution only to have that solution wash partially away during Hurricane Harvey. The Brazos River is constantly working in the bridge components and worked its way around the structure installed by the TxDOT. The Brazos River solution must be more pragmatic and address the area upstream and downstream to ensure the bridges are adequately protected. In an attempt to address this concern, TxDOT is designing new bridges but they are limited to their right-of-way and will only build longer bridges. However, the construction of longer bridges does not ensure protection of the evacuation route from future riverbank erosion.

By way of example, during Hurricane Harvey, the US 59/I-69 bridge over the San Jacinto River was compromised when the river washed out material around the footings of the interior bridge supports. This significantly impacted the population seeking safety from the storm as well as first responders and emergency personnel to respond. In an effort to avoid this tragic situation, the proposed solution to stabilize the Brazos River will ensure significant changes in the river are controlled, thus avoiding the issues experienced on US 59 over the San Jacinto River.

Should any portion of either of the US 59/I-69 or SH 99 bridges become compromised due to river bank erosion, in future incidents in which evacuations from the coast are called for, the evacuation route itself could become comprised, putting lives in danger.

Project Schedule:

Fort Bend County has properly procured the services of a Grant Administrator and Project Engineering Firm to properly execute the project. Upon the authorization to proceed, the Engineering will begin with the performance of Surveying and Geotechnical Investigations. There will be an in-depth hydrologic and hydraulic study performed to finalize the design and ensure all floodplain regulations of Fort Bend County are properly followed. Findings of these investigations and studies will be memorialized in a study document. The design phase is anticipated to take approximately 14 months. During this phase the project will be coordinated with local, state and federal partners to ensure all permits are properly obtained. Upon the permitting of the project, the bidding phase will take approximately 2 months and will follow all County, state and federal procurement requirements. Construction will take approximately 19 months to complete. The engineering firm will participate in the review of all construction related documentation.

CDBG-MIT: Budget Justification of Retail Costs (Former Table 2)

Cost Verification Controls must be in place to assure that construction costs are reasonable and consistent with market costs at the time and place of construction.

1. Identify and explain the annual projected operation and maintenance costs associated with the proposed activities.

Annual projected operation and maintenance costs will be less than \$50,000. This cost will include annual inspections and post storm event inspections. Periodically the stone used for the erosion project will be replenished and funded through the Capital Improvement Program. No annual replenishment of the stone will be required.

2. Identify and explain any special engineering activities.

Drive Time Analysis

This congestion calculation was performed using a method created by TxDOT referred to as the 'Car Space' method. This method factors number of lanes, Annual Average Daily Traffic (AADT), and average car length to calculate the space remaining between vehicles for each 1 mile segment of roadway during the 26th peak hour. The calculated space between cars, or lack thereof, is categorized to illustrate levels of congestion.

Congested = less than 175' between cars

Moderately Congested = between 175' and 350' between cars

Not Congested = greater than 350' between cars

C) Hurricane Harvey State Mitigation Competition Scoring Criteria

Fort Bend County - Brazos River / Evacuation Route

Question(s)	Criteria	Maximum Points	Self-Score
What is the project service area's Composite Disaster Index?	County Composite Disaster Index	10 Points Possible	10
	<i>Top 10%</i>	<i>10 Points</i>	X
	<i>Top 25%</i>	<i>8 Points</i>	
	<i>Top 75%</i>	<i>5 Points</i>	
	<i>Bottom 25%</i>	<i>2 Points</i>	
	<i>Bottom 10%</i>	<i>0 Points</i>	
	<i>Prorated CDI rank</i>	<i>Calculated Points</i>	
What is the project service area's Social Vulnerability Index (SoVI)?	Social Vulnerability Index	10 Points Possible	2
	<i>High</i>	<i>10 Points</i>	
	<i>Medium High</i>	<i>8 Points</i>	
	<i>Medium</i>	<i>5 Points</i>	
	<i>Medium Low</i>	<i>2 Points</i>	
	<i>Low</i>	<i>0 Points</i>	
	<i>Prorated SoVI rank</i>	<i>Calculated Points</i>	X
What is the project service area's Per Capita Market Value?	Per Capita Market Value	10 Points Possible	2
	<i>Less than \$40,000.00</i>	<i>10 Points</i>	
	<i>\$40,000.01 - \$65,000.00</i>	<i>8 Points</i>	
	<i>\$65,000.01 - \$100,000.00</i>	<i>5 Points</i>	
	<i>\$100,000.01 - \$250,000.00</i>	<i>2 Points</i>	X
	<i>\$250,000.01 or greater</i>	<i>0 Points</i>	
Does the project meet the low-to moderate-income (LMI) HUD National Objective?	LMI National Objective	20 Points Possible	20
	Project meets LMI national objective	<i>20 Points</i>	X
	Project does not meet LMI national objective	<i>0 Points</i>	
Is the project type identified in a Local Adopted Plan?	Project type Identified in Local Adopted Plan	5 Points Possible	5
	Project type identified in local adopted plan	<i>5 Points</i>	X
	Project type not identified	<i>0 Points</i>	
What is the applicant's management capacity?	Management Capacity	15 Points Possible	11.25
	No CDBG-DR contracts with GLO (management capacity assessment)	<i>Up to 15 Points</i>	

Question(s)	Criteria	Maximum Points	Self-Score
	Performance on GLO CDBG-DR contract(s), programs and/or projects	<i>Up to 15 Points</i>	X
What is the total project application amount per total project beneficiaries?	Project Impact	25 Points Possible	15.99
	Total project application amount per total project beneficiaries	<i>15 Points</i>	12
What is the percentage of project beneficiaries out of the total population within the applying jurisdiction(s)?	Percentage of total project beneficiaries out of the total population within a jurisdiction(s)	<i>10 Points</i>	3.99
What percentage of project costs being requested are coming from non-CDBG funding sources?	Leverage	5 Points Possible	5
	Non-CDBG Leverage (a minimum value of 1% of the CDBG-MIT funds requested)	<i>5 Points</i>	X
What mitigation or resiliency measures have been taken by the applicant(s)?	Mitigation/Resiliency Measures	5 Points Possible	5
	Measures taken by the applicants(s)	<i>5 Points</i>	X
Total Possible Points		105 Possible Points	76.23
Tie: Breaker: Higher Poverty Rate			

\$97.8M

*Applications that do not score a minimum of 65 points will only be considered after all applications scoring greater than this amount have been funded.
