Be healthy

Good oral health means more than just an attractive smile. Research shows that oral health, preventive care and regular visits to the dentist is integral to overall health. For example, the Academy of General Dentistry says there is a link between gum disease and heart problems, and the American Academy of Periodontology says severe gum disease can increase blood sugar, increasing the risk among diabetics. The HumanaDental DHMO plan enables you to take better care of your teeth, and you'll pay less doing so.

Healthy smiles lead to healthy lives

Good oral health is essential for well-being

A healthy smile starts with good oral hygiene. Brushing, flossing and seeing the dentist regularly help teeth and gums look and feel better. But that's just the start.

The mouth can be a window to the body. Medical researchers discover more connections between good oral health and good general health every year. Poor oral health has been linked to a variety of general health problems, such as heart disease and strokes.

More than 47 percent of Americans suffer from periodontal disease¹

Dental insurance makes good oral health easy and affordable

As a health and wellness company, we recognize the strong connection between good overall health and good oral health. That's why **Humana dental plans** make dental care more accessible and affordable for you.

Choose your dentist from our nationwide network of more than 252,000 dentist locations. Plus, you'll enjoy our network discount, which can help you save on preventive and treatment services.

Get preventive care to keep little problems from becoming big issues. Humana dental benefits include
100 percent coverage for two routine cleanings each
year plus other preventive care including exams, X-rays,
space maintainers for children and oral cancer screenings
with no deductible. You even have the benefit of
four periodontal cleanings each year. Check with your
employer for coverage details.*

Oral infections are linked to: 16 percent increase in heart disease and 9 percent increase in diabetes³

Dental insurance facts

How to choose a plan that meets your needs

Enrolling in the dental benefits plan offered by your employer can be a wise decision

For less than the cost of a cup of coffee a day, you can get both preventive and treatment services when and where you need it. With an affordable premium and a network discount on services, you won't need to delay dental care for you or your family.

These are the types of dental benefit plans that may be available as part of your employee benefits package:

- An HMO (health maintenance organization) plan is a copay-based, network-only offering that requires selection of a primary care dentist. Each family member on the plan can choose his or her own dentist. Because each service has a copay, members have clear upfront costs. There are no yearly maximums, no deductibles and no waiting periods.
- A PPO (preferred provider organization) plan offers low deductible options for preventive, basic and major services. In-network dentists provide dental services at a reduced rate. Members have higher out-of-pocket costs for services received from out-of-network dentists.
- A traditional preferred plan offers low deductible options for preventive, basic and major services, and the flexibility to see any dentist. With this plan, members receive the same level of coinsurance with all dentists. However, when members choose dentists in the Humana Dental PPO network, they can benefit from our negotiated rates for services received from in-network dentists.
- A Preventive Plus plan covers commonly used basic and major services, including exams, X-rays, cleanings and fillings. Plus, discounts may be available on additional services like crowns, inlays, oral surgery and orthodontia. Contact your provider to determine if any discounts are available on non-covered services.

Ask your employer about your Humana dental plan options today.

How an affordable premium can save you money

As an example, if your plan premiums cost \$360,* dental insurance can save you money on both preventive and emergency care.

You may save as much as \$277 with dental insurance*

Here's an example:

Preventive service	Average cost per visit	# of visits recommended each year	Annual cost
Preventive exam	\$50.00	2	\$100.00
Periodontic cleaning	\$150.00	4	\$600.00
Bitewing X-ray	\$60.00	1	\$ 60.00
Out-of-pocket costs without dental insurance			\$760.00
Out-of-pocket costs with dental insurance ¹		\$122.80	
Your annual premium with dental insurance		\$360.00	
Your savings with dental	insurance		\$277.20

*Data rounded based on 50th percentile of Fairview Health data as of January 2014 for metropolitan Houston, Texas. Example is for illustration purposes only, and individual results may vary.

The cost of repairing cracked or broken teeth or replacing missing teeth can add up quickly:

- The average cost of an all-porcelain crown is about \$1,430 per tooth²
- The average cost of a single tooth implant with an all-porcelain crown is about \$4,250²

Having dental insurance can help get the care you need when you need it, by reducing your out-of-pocket costs.
